## Professional Summary

Performance-driven Systems & Infrastructure Administrator with nearly a decade of experience managing enterprise networks, Azure-based environments, and mission-critical production systems. Proven track record of maintaining 90%+ SLA compliance through rigorous monitoring, data-driven system analysis, and cross-functional incident response. Expert in scripting infrastructure-as-code automation, managing vendor relationships, and delivering Tier 2/3 engineering support to eliminate operational downtime.

## Technical Skills

**Cloud & Infrastructure:** Azure cloud services, Infrastructure as Code (IaC), enterprise networking  
**Automation & Scripting:** Python, PowerShell, Terraform, Vibe/Agentic Coding  
**Networking & Security:** DNS, DHCP, VPN, Firewall Management, Endpoint Monitoring  
**ITSM & Support Tools:** ServiceNow, Salesforce, NICE, Genesys Cloud, Excel Reporting, Visual Studio, Xcode

## Projects

- Network Infrastructure Upgrade — Computer Plus Solutions**
  - Designed and deployed scalable business network infrastructure including gateways, managed Layer 2/3 PoE switches, and custom VLAN segmentation to meet strict performance and security requirements.
  - Deployed localized, AI-driven security frameworks (UniFi Protect) utilizing PoE topologies; optimized device power budgeting and verified Fast Ethernet (FE) data sync across physical links.
  - Engineered secure network zoning, NAT, and routing policies to completely isolate public, corporate, and Operational Technology (OT) traffic (signage, signals, fleet tracking) while enforcing strict access controls and QoS.
  - Diagnosed and resolved complex Layer 2 device adoption loops by executing factory NVRAM resets and navigating advanced SSH adoption sequences to restore secure device states.
  - Validated switch and routing infrastructure performance, establishing continuous monitoring to ensure high-availability access for staff and secure vendor-hosted systems.

## Experience

- System Administrator** 03/2021 – 08/2022  
*nVent HOFFMAN* Anoka, Minnesota, United States
  - Optimized access controls and identity management in Azure to strengthen environment hygiene.
  - Engineered robust infrastructure-as-code (IaC) deployment pipelines using Terraform, Python, and PowerShell to automate environment provisioning, reducing manual configuration errors and accelerating deployment times.
  - Supported hybrid cloud deployments, created incident response documentation, and improved recovery times for critical services.
- IT Support Specialist** 09/2016 – 02/2021  
*MTN Cameroon* Bamenda, Cameroon
  - Installed and configured network devices supporting 100+ users and maintained high-availability connectivity in distributed environments.
  - Troubleshoot DNS, DHCP, VPN, and connectivity issues; maintained firewalls, endpoint monitoring, and device patching.
  - Performed on-site hardware configuration and network segmentation to support secure, resilient operations.
- Workforce Management Analyst (Real Time Analyst)** 08/2022 – 12/2024  
*Willis Towers Watson* Bloomington, Minnesota, United States
  - Monitored adherence and service levels for 100+ agents using NICE and Genesys Cloud.
  - Performed deep data mining and log analysis to construct comprehensive Excel dashboards and historical performance reports, ensuring continuous 90%+ system SLA compliance across large operational units.
  - Used historical data to optimize staffing, reduce variance, and maintain SLA targets.
- Client Technical Support Specialist** 10/2025 – 01/2026  
*Roundel, Target Corporation* Minneapolis, Minnesota, United States
  - Managed Tier 2/3 platform incidents and system access controls using ServiceNow; conducted root-cause analysis on critical system bottlenecks to maintain peak operational availability.
  - Escalated complex issues with clear ownership and timely follow-through while preserving system integrity.
  - Contributed to incident documentation and post-incident reviews to reduce recurrence and improve platform resilience.
- Chat & Phone Technical Customer Service** 03/2025 – 04/2025  
*Foundever* United States
  - Assisted TurboTax users with software, login, and connectivity issues via chat and phone.
  - Documented reproducible troubleshooting steps to speed follow-up and handoff.
  - Escalated high-impact cases with complete technical notes for faster resolution.

## Education

**Azure Cloud Computing** | NoelTechSolutions | 10/2022 – 02/2023  
**Cisco Networking (CCNA Routing and Switching)** | Cisco Networking Academy | 10/2016 – 01/2017  
**GED, Computer Science** | St. Rita's Technical and Commercial School | 08/2010 – 06/2012

## Licenses & Certifications

**Microsoft Certified: Azure Solutions Architect Expert**  
Microsoft | Issued Nov 2024  
**Microsoft Certified: Azure Administrator Associate**  
Microsoft | Issued Sep 2024
